

Pricing List Water Quality

Basic pricing

The eoWater services can easily be ordered in subscription mode. For a yearly monitoring, prices¹ start at EUR 1,000 for one product per waterbody or geocoordinate. For each additional product, a surcharge of 5% is applied.

Inquiry process

- ✓ Define the geocoordinate(s) that represent your waterbody of interest (e.g. ESRI Shapefile, kml, coordinates)
- ✓ Define your desired products
- ✓ Send your request to sales@eomap.com or upload it at www.eomap.com/order/
You will then be contacted by our sales team with further information and a quotation

Service features

- ✓ Highest temporal resolution through harmonized multi-satellite processing technology, expandable with very-high-resolution satellites up to 1m spatial resolution.
- ✓ Archived information for up to 30 years back in time.
- ✓ Additional features on request, e.g. areal or nationwide data, alternative data delivery, complementary map products, environmental consulting and routine reporting.
- ✓ Data delivery as standard tabular file, easy online visualization and access through interactive web-application eoApp® for areal data, or Application Programming Interface (API) to facilitate seamless integration into existing workflows.

Expected numbers of observations

Min. waterbody width	No. of measurements per year ²
> 50 m and < 1,500 m	20-75
> 1,500 m	100-365

eoWater standard products

Product ^{3,4}	Abbreviation	Unit
Turbidity	TUR	NTU
Chlorophyll-a	CHL	µg/l
Harmful algae bloom indicator	HAB	descriptive
Sea surface temperature	SST	°C
Total and organic absorption, dissolved org. matter	ABS, SOA, DOM	1/meter
Secchi disc depth, light penetration depth	SDD, Z90	meter

For customized products or extended areas, please contact sales@eomap.com

¹ Minimum order volume: EUR 4,000. Binding price information only available upon order confirmation after inquiry.

² The actual number of satellite records depend on regional and seasonal environmental conditions, e.g. cloud cover.

³ Restrictions may apply depending on water body characteristics. A feasibility for the selected products is provided as part of the inquiry process.
