LiteCOR-X

EXPAND YOUR SURVEY DATA WITH
SATELLITE-DERIVED BATHYMETRY

ESTABLISH STATE-OF-THE-ART SATELLITE-DERIVED BATHYMETRY CAPABILITY
IN YOUR TEAM

This desktop software by EOMAP, extends existing bathymetric survey data and fills shallow water data gaps. Survey data are mandatory for this software.

LiteCOR-X generates Satellite-Derived Bathymetry (SDB), including depth uncertainties.

Advantages at a glance:

- Generate validated shallow water bathymetric data to fill survey gaps or expand survey coverage.
- Robust and very easy to use, even for non-experts.
- Rapid access to bathymetric results, typically in less than one hour.
- Desktop solution which can be run in secured environments.
