*Filling data gaps*

## SATELLITE SERVICES

Bathymetry | Habitats | Sediment loads | Imagery |  
Erosion | MetOcean | Obstructions | GeoIT solutions

**EOMAP** is the world leader in providing earth observation services for aquatic and coastal applications. With direct access to satellite data and a strong R&D network we bridge the gap to the real-world applications of engineers, decision makers, environmental agencies and consultancies .

### HOW TO ORDER:

1. Send your area of interest to [order@eomap.de](mailto:order@eomap.de) and define your application and information you are searching for
2. We provide a feasibility assessment and a quotation
3. Confirm order and access your new data

### DELIVERY

Our aim is to provide the easiest access to big data from space. Deliverables can be visualized through web applications (eoApp®), integrated into GIS using WMS/WCS or accessed through ftp.
